Selected Northern Grown Seeds.

PLANT BARNES' SEEDS
THEY GROW

MISTAKES WILL HAPPEN WITH THE BEST OF US.

We do not claim to be infallible. We are human. Systematized as is our Organization, a mistake will occasionally creep in; and when it does occur, we are "Johnny on the spot" to make right anything which proves not just as it should be; in other words, ever ready to correct an error. We want no reasonable person to have just cause for complaint.

When you feel justified in making complaint, matter not what the nature, you will be doing us a favor by frankly presenting the case to us without delay. If you fail to do so, it keeps us in ignorance of a possible wrong, thus making us victims of circumstances over which we have no control, because of our having no knowledge of the facts. Procrastination is the thief of time, to say nothing about suspicion overturning what confidence builds—which can be avoided by not putting off until the morrow what can be done today.

O. J. BARNES SEED CO.,

Business Established 1890, Malone, N. Y.

O. J. BARNES.**

Descriptive and Retail Price List

— OF —

O. J. Barnes Seed Co.

The Best is the Cheapest.

To no one class of merchantable goods does this fact apply more seriously than it does to Seeds, for the reason that the one year of time **lost**, to say nothing of the money wasted on so-called cheap stuff can never be regained. Life is much too short to trifle with time. The most important consideration then upon which the patron should reflect when giving an order is whether the seeds offered will produce for him or her **paying results**, and, in so doing, decide the very best he or she can obtain will be none too good. When anything is cheap as a rule it is necessarily of inferior quality. No reliable firm would sell poor seed and no intending planter wants it for it will not produce for him satisfactory results; it **cannot** any more than a starved or diseased horse can do the work of a perfectly healthy one.

No legitimate business can be **honestly** conducted unless there is a living profit in it.

A man trying to obtain the value of two dollars for one or is seeking for something for nothing is not a **perfectly honest man** in the true meaning of the word **hon-**

est. Such men know, while they may not be willing to admit the fact, that in order to **even** things up in connection with a pretended **bargain** transaction, someone has got to be swindled. The innocent purchaser, with his senses insulted and his intelligence warning him of his foolish action, seemingly does not care who gets swindled so long as it is not he; that is to say, in plain English, he is perfectly willing that someone else should be swindled and will, in fact, assist all he can in bringing the swindle to a successful termination, stupidly reasoning that some other man is going to **give** him more than the value of his money.

Could he, the purchaser, afford to work for nothing? Would he want to? No, indeed. Then why and by what right expect or demand the same from others? If people were willing to pay a **living** price for an **honest** article, and which is all that we ask, they would **never** have had any just cause for complaint, and not only that, but would save money in connection with their purchases of seeds, as well as gaining time.

Our customers have all the **immense** benefits that are obtained as a natural result of over 25 years' experience in the seed business, our hard work, skill, experimenting, etc. But even all this would not avail were there not connected with it the **utmost honesty and earnestness of purpose.**

Now, to do all this **costs money**; no improvement can be made without it.

Our Seeds are among the **Best** and **Cheapest** in the **United States**.

In making these statements we **mean every word** that we say, and it stands to reason, certainly must so appeal to every **intelligent man**, that we would not be enjoying the **great reputation** we have all over the country, had not **our** seeds **proven** themselves to have been the **best** and they have had the **severest** tests in this North Country and adjoining sections running through a period of over 25 years.

It makes no difference in **what** business a man is engaged, unless he **acts honestly and intelligently** towards it, he **cannot** make it pay, be he farmer, manufacturer or seedsman.

Why has there been so much complaint on the part of purchasers of seeds as a rule? It is because they have purchased from sources that made **prices** instead of **quality** their greatest consideration.

Safe rule to follow:—Buy the **best**, plant the **best** and best of all harvest the **best** results. Our success is the true test of merit.

Now, sir, to **you** as our agent, or to any one who reads what we have written, does it stand to reason that we can grow, or have grown for us the tested, improved

varieties of seeds at same price as the old-as-the-hills varieties with no special merit except they are cheap and used by our fathers and grandfathers. We claim there is reason for progression in the seed business same as in all other lines of business and, therefore, we spare no pains in furnishing our friends and patrons with seeds that are the best known to seed science up to date and our rapidly increasing patronage is proof that our customers appreciate these facts.

Prices given in this Price List are subject to change without notice.

We shall, however, adhere as closely as possible to these prices, making no advances unless it is absolutely necessary. If large quantities are desired or a general list of seeds wanted, we shall be pleased to make special prices by mail. So send in your list of seeds wanted.

We do not claim to compete in prices with some dealers or jobbers who obtain stock of seeds from any source regardless of quality, but we do claim to sell the very best seeds that can be produced and that are suitable for the most critical trade. Cheap seeds should be shunned by all dealers who wish to build up a seed trade and satisfy their customers. The best seeds which are possible to grow are the cheapest in the end.

Bags necessary for safe transportation are charged at cost on wholesale orders only.

We warrant our seeds—While crops occasionally fail from natural causes that are beyond the control of the Seedsman or Cultivator, it is certain that good crops cannot be raised from poor seeds. It is only reasonable that the planter should require some guarantee of the purity and freshness of the seeds he purchases, therefore **we warrant our seeds to be pure and true to name and of strong vitality**—in so far that should any prove otherwise we will refill the order at half price. We will not in any way be responsible for the crop.

O. J. BARNES SEED CO.,
Malone, N. Y.

To Our Numerous Patrons and Friends:

We desire to express our appreciation for whatever favors you have shown us in the past and to assure you that it will be our earnest aim, as well as the aim of our faithful employees, to merit a liberal share of your future orders; and in this spirit, we take a great deal of pleasure and considerable pride in presenting to you Our Retail Price List with descriptions of some of our best varieties for the garden and farm.

This Price List we have prepared with great care, prices being as low as possible, consistent with quality, that cannot be excelled.

Important.

In the List which follows we aim to include only such varieties as we can recommend to our Patrons as first class in every respect. More satisfactory results are brought about than if we embraced in said list many so-called novelties or new creations which so often cause Disappointment and Loss.

Remember, a star (*) is used to mark those varieties which are absolutely the best of their class. Therefore you can make no mistake in ordering those varieties.

Remit by Money Order, Registered Letter or Check, direct to O. J. BARNES SEED CO., 50 Wellington Street, Malone, N. Y.

Upon our patrons' success depends our own.

1890
1922 **BARNES'**

VEGETABLE SEEDS.

Of strong vitality and choice selected strains. We grow and have grown for us seeds as good as can be grown. Remember Barnes' seeds are not "cheap seeds," but are sold at prices as low as seed of uniformly equal high quality can be had anywhere. No matter what price you might pay you would not get better seeds.

Please bear in mind we have marked with a star (*) those that are considered from our trials and also patrons to be the **best** of their respective types for general cultivation.

SEEDS POST PAID BY MAIL.

Prices quoted include payment of Postage on all seeds by the packet, ounce, quarter lb, pound or pint, that is, seeds by the pound as well as all smaller quantities are **delivered free to any address** not only in the United States and its colonies, but also to all foreign countries enjoying with us the benefits of the International Parcel Post. We deliver free also by parcel post **Beans, Peas and Sweet Corn** by the quart and four quarts to any address within three hundred miles of Malone, N. Y., that is, within the first three zones.

We guarantee safe delivery of all seeds whether sent by mail, express or freight.

DON'T FORGET.

About ordering the Varieties of Vegetables or Farm Seeds with a Star as these are the cream of all other Varieties or the very best in their class.

TERMS.

Orders from unknown parties must be accompanied with cash or satisfactory reference.

A New Variety
BARNES' GOLDEN GIANT SWEET
CORN.

Grown by O. J. Barnes, on his own grounds, this season..pkt. 25c sufficient for 100 hills.

Pint 40c., qt., 75c.

GOLDEN GIANT—The Most Desirable Sweet Corn on the Market ToDay—on account of its Most Excellent Quality; its 12 to 16 Rowed Ears and deep, Golden Yellow Kernels, so juicy and tender. These merits and its earliness render it a genuine acquisition. A strong grower and very productive.

LATE VARIETIES.

Stowell's Evergreen, Same prices as

POP CORN—CONTINUED.

Barnes' or Perry's Hybrid.

POP CORN.

Black Wonder, of splendid quality, color a blue black, large kernels, pops white as snow and a great yielder. This variety is same as used at the celebrated Thousand Islands,

pkt. 15c., pt. 20c., qt. 60c., 4 qts. \$2.00.
White Rice Pop Corn, the standard varie-

ty, pkt. 10c., pt. 20c., qt. 40c., price per bushel given on application.

Quick-pop Pop Corn, an entirely new variety, earliest and best. Most surpassingly delicious in flavor. Enormously productive. As name indicates—Sure and Quick to Pop. Is dwarf in growth, stalks not averaging much over three feet in height, but what it lacks in growth and size of ears is fully made up in productiveness and quality. A real novelty in excellence. A single trial will convince the most skeptical that the Quick-pop Pop Corn is a decided acquisition in the line of improved varieties. Supply small and limited. Secure your seed early if you want an improved variety of extra early pop corn, Sure and Quick to Pop; color light yellow,

pkt. ($\frac{1}{4}$ lb.) 20c., 1 pt. 35c., 1 qt. 60c., 4 qts. \$1.50. Price on larger quantities given on application.

POP CORN—CONTINUED.

*White Wonder Something new, Extra Early to Mature. Extra large when popped and Extra good quality. Prices same as Quick-pop.

CITRONS.

Colorado Preserving, pkt. 10c., oz. 15c.

A New and Successful Method of

RAISING ONIONS.

THE SPANISH ONION OR PRIZE TAKER CAN BE EASILY GROWN BY THIS NEW METHOD.

Prices given on application for 1000 plants or more.

Instead of Sowing the Seed you Set Out the Plants the same as you would Cabbages or Turnips.

By this method you are sure of having onions fully matured, and larger and better in every way than onions grown from seed.

Per 100 plants postage prepaid, \$1.25.

Read the following Testimonials carefully from some of those who tried them last season: To all whom it may concern:—

This Certifies that I set out 100 of Mr. Barnes' New Variety of Onion Plants. They were a great success. The largest and best onions I ever raised. I had little over a bushel from the 100 plants. So large that most of

 Do Not Hold a Penny so Near the Eye, as to Lose Sight of a Dollar Close By.

ONION SETS—CONTINUED.

them weighed one pound each, and from that down to one-half pound, and the quality was excellent.

TOM MERCER,
Wellington St., Malone, N. Y.

It is a pleasure to recommend Mr. Barnes' new plan of raising Onions. I tried 50 plants, and grew one-half bushel of fine, large onions. Special merits—Large size and excellent quality.

MISS MINNIE CROWLEY,
Malone, N. Y.

Another testimonial from Jefferson Co., N. Y.

I was pleased with our crop of fine, large onions grown from the 100 plants I got of you. We want 200 of you for next season. I have seen and talked with several that tried your new method of raising onions and they all claim they were a great success, in fact the best onion they ever raised.

WM. SPIES, Redwood, N. Y.

On my own grounds I set out 1200 plants and raised 8 bushels of fine, large onions. These onions were better than any onions I have ever grown from seed and at a less expense and trouble in growing.

O. J. BARNES, Malone, N. Y.

Send in your orders quick if you want to raise some Prize Taker or Spanish Onions next season. Prices Right. Quality the Best. My supply of these plants will be quite limited.

ONIONS.

20 to 30 inches in height, bearing well filled, medium sized pods. The dried seed is of bluish green color,

pkt. 10c., pt. 25c., qt. 40c., 4 qts. \$1.50, 1 peck or 8 qts. \$3.00. Prices per bushel given on application.

Black Eyed Marrowfat, the good old variety our fathers and grand-fathers used to grow. Good quality and good yielders,

pkt. 10c., pt. 20c., qt. 35c., 4 qts. \$1.00.

EXTRA EARLY WRINKLED VARIETIES
THAT DO NOT REQUIRE ANY BUSHING.

Extra Early Wrinkled Varieties. These, while of quick growth and very early maturity, cannot be planted so early as the round-seeded extra earlies in the preceding class, as the dry seed, being wrinkled or shriveled by reason of the large percentage of sugar they contain, is not so hardy and would be liable to rot in the ground if planted before the soil has become partially dried out and well warmed in the spring. They are especially fine for a second planting in the garden, and will come on quickly and furnish a good supply of the finest and sweetest peas early in the season. Allow one and one-half pints for each one hundred feet of row.

*Extra Early Gradus, also called "Prosperity Pea." This popular new large-

EXTRA EARLY WRINKLED VARIETIES
OF GARDEN PEAS—CONTINUED

podded wrinkled pea of finest quality matures pods only two or three days later than the small-podded round-seeded extra earlies. The vine has heavy stems with large light-green leaves, and grows three feet high. It produces uniformly large pods, measuring from four to four and a half inches in length, nearly round, and well filled with very large handsome peas of the finest flavor. The peas remain tender and sweet for some time after they are large enough to use,

pkt. 15c., pt. 30c., qt. 60c., 4 qts. \$2.00,
pk. \$4.00.

*Early Eclipse, one of the best extra early peas for market and private garden,

pkt. 15c., pt. 30c., qt. 60c., 4 qts. \$2.25,
8 qts. \$4.00.

*Nott's Excelsior, Early, Fine variety of compact dwarf growth, with pods 1-3rd larger than those of the American Wonder, averages three inches in length, well filled to the squared ends, large peas of unusually sweet flavor,

 Say to Our Patrons, If We Please You
Tell Others, If We Do Not, Tell Us.

GARDEN PEAS—CONTINUED.

*Japanese Millet, sometimes called Billion Dollar Grass (*Panicum Crus Galli*), Japanese Millet is one of the most remarkable forage plants ever grown, noted for its luxurious growth, often growing 6 feet tall, remarkable for the immense amount of hay it produces from each acre, and remarkable for its feeding value. It seems to be adapted to all sections, does especially well on low ground, makes more hay than any other type of millet, such as German, Pearl or Hungarian and requires less seed per acre than any other variety. If desired for hay cut just before it heads out, sow seed in May or June for best results, lb. 15c.

10 lbs. and upwards 12 cts. per lb.

lbs. at one time \$11.00.

A Poor Article is Dear at Any Price.

FARM SEEDS

Fodder Corn and Field Corn.

I make a specialty of handling the best High Bred Seed Corn in the United States. Some Corn dealers are offering so-called seed corn which they claim is just as good as Barnes' at 25 to 25 cents per bushel less, and even in some cases 50 cents. Don't buy it, if you want **cheap corn**, buy the **Elevator or Milling Corn**, which is still less in price.

Extra Early White Flint. Price \$4.00 per bushel. Fine to husk and shell for a nice crop of Flint corn.

EXTRA EARLY VARIETIES FOR FODDER.

*Early Michigan, an early variety, noted for its early large crop of mature ears, as well as its rich, nutritious quality and leafy habit of growth. Owing to the great demand of this variety I have not been able to fill all my orders for it in the last three years. Hope to have enough for this season's trade. I would advise the booking of orders early, \$3.50 per bu. for extra selected hand-picked quality, selected from crib when being shelled, thoroughly re-screened, removing the smaller tip and screened, carefully, hand-picked and tested before shipment.

Improved 90 Day Dent—one of the popu-

lar early varieties, but by careful test on our own grounds not quite as early as the Early Michigan, but a bigger growth, per bushel \$3.50

Barnes' Improved Mastodon Corn.

Since its introduction more seed of this variety has been sold than any other sort ever introduced. This in itself is a great recommendation for the merits of Improved Mastodon Corn.

It has been tested in Vermont and Province of Quebec, Canada, with very gratifying results. Secure your seed through the O. J. Barnes Seed Co., Malone, or any of their duly authorized agents if you wish to have a carefully selected stock of a fixed pure type expressly for seed purposes.

We have each year carefully selected our stock of this corn until now we have a fixed pure type of this wonderful fodder corn. It is as important to select and grow a pure and perfect type of corn, as it is to select a well-formed hog or perfect type of dairy animal for breeding purposes.

Special merits of this corn; large growth, leafy, nutritious and early. The stalks attain under normal conditions a height of eight feet; the foliage is large, healthy and makes unusually fine fodder therefore fine for silos, or for fodder corn to raise for cattle instead of hay. In field

tests with other leading varieties planted under precisely the same conditions and given the same treatment, it has averaged about 50 per cent. greater crop than any of the other varieties. The constitution of the corn is such as to resist extremes of weather to the last degree, and we offer it with the conviction that it will prove a sensation with all those who want an early, valuable fodder corn.

Ears average 9 to 11 and 12 inches long, 20 to 30 rows on the cob, many stalks bearing two to five large ears, some weighing $1\frac{1}{2}$ to 2 pounds each and handsome shape. The silo men want it because it grows quick and powerful. Buy the best. Plant the best. **Harvest the best.** Supply limited. Book your orders early.

Per bushel \$3.50.

Barnes' Imp. Leaming, bu. \$3.00

Barnes' Early Mastodon, bu. \$3.00

White Cap Yellow Dent, for extra select hand-picked kiln dried and tested, bu. \$3.

Ensilage, Southern White, Pride of
North and all other old-time varieties
for sale. Prices given on application.

SOMETHING NEW.

*Early 8-Rowed Pedigreed Yellow Flint
Corn or Wheeler's Improved Angel of
Midnight.

This is an eight-rowed variety; kernels

medium, and the ears (many of them 15 inches long) are filled out to the very tips. Corn stalks firm and solid; much larger than the common run of Flint sorts. Under average conditions and without a great amount of fertilizer we have seen stalks of this Pedigreed Corn averaging nine feet in height. Under good tillage from 18 to 20 tons per acre of fodder has been produced.

The rows of kernels are practically straight, small butt, and husks easily, and every ear is hand sorted that we offer for Seed. It is grown in New York State, and best of all will mature in eighty-five to 90 days. The stalks make the Best of Fodder.

The Ears are high, therefore saves waste if **Harvester is Used**.

Order early as the supply is small and limited.

For sale by **O. J. Barnes Seed Co.**, the Northern New York Seedsmen, or any of their Authorized Salesmen.

8 qts. \$1.15, per bu. \$4.00.

SOMETHING NEW.

This is the corn recommended so high by all the Farm Bureaus all over the State.

*Golden Glow (or Wisconsin No. 12) claimed to be the earliest good sized variety of Dent Corn in existence. Something early and yet large enough

for a profitable variety for general culture as a fodder or ensilage corn. It is noted for giving a big crop of good sized ears. It was awarded first prize at the International Corn Show in Wisconsin (year 1913) as the best yellow Dent Corn. Description:—Golden Glow is a pure yellow Corn, most attractive in color and appearance, ears are fairly large, averaging about eight inches in length, symmetrical in shape, slightly tapering with exceptionally well filled tips; kernels of good length for such an early corn, very free from a tendency to flintiness; stalks large and strong with abundant foliage, making it therefore a very desirable variety for fodder or the silo. Supply is limited, send in your orders early, 4 qts. 50c., 9 qts. 75c., bu. \$3.00, for corn not shelled, selected ears, \$4.00 per bu. (of 70 lbs) The ideal way for keeping corn. In Canada, \$3.00 per bushel.

SEED POTATOES—Northern Grown.

An entirely new variety of potatoes, viz: Green Mountain, Jr. Wonderful to yield, fine for market and table, pure white, vigorous and healthy,

30 lbs. \$1.50.

For larger quantities than 1 bushel, prices given on application.

Early Queen, an improved variety of extra early potatoes, that for quality cannot be excelled and also productive, has many other good traits, which taken together renders it the most valuable early potato of recent introduction. Supply small and limited, 30 lbs. \$1.50. Larger quantities prices on application. The Standard 6-Rowed Barley, fine, clean, first-class seed, the pedigree Barley, 4 qts. 50c., 8 qts. 90c., 1 bu. \$3.25, 2 bu. and upwards per bu. \$3.00. Order quick, going fast.

Dwarf Essex Rape.

A very profitable crop to grow for poultry. Try it. This is what we grow for our green feed in summer for our poultry. Nothing like it to make hens lay in Aug. and Sept.

An immense amount of green feed, and its nutritive value is nearly twice that of clover. It may be sown any time from early spring until September with grain or alone. A word about the seed. We aim to get what is entirely free from bird rape, mustard or anything of that sort. The Dwarf Essex is the only desirable variety. Makes a splendid fall feed for cattle, sheep or swine. Rape is usually ready for use in about 8 or 10 weeks from date of seeding. 10 lbs. seed great plenty for one acre. Looks like turnips in growing.

25c per lb. any quantity in U. S. or Canada.

MISCELLANEOUS. SEED OATS.

Spring Wheat, Spring and Winter Rye can be furnished, prices given on application; also Soy Beans and Spring and Winter Vetches.
